

BRANDON & CLARK, INC.

AIR HANDLING SOLUTIONS

**Air Compressors • Portable Air Compressors • Air Dryers
Contaminant Removal Systems • Replacement Parts • Filters
Field Services • Repair • Maintenance • Air Audits • Air System Design**

CAPABILITIES AT A GLANCE:

- Sales-Service-Installation-Repair
- Portable Air Compressors
- Single & Two Stage Reciprocating
- Single & Two Stage Rotary Screw
- Variable Capacity Rotary Screw
- Variable Speed Rotary Screw
- Two-Stage High Pressure Rotary Screw
- Rotary Screw Vacuum Pump
- Oil Free Rotary Screw
- Rotary Screw Heat Recovery System
- Point of Use Dryers
- Air Dryers - Refrigerant & Desiccant
- Contaminate Removal Condensate Drains
- Contaminate Removal Oil/Water Separators
- Filters, Mist Eliminators, & Lubricants
- Piping Systems to Point of Use
- AirTility Services
- Air Audits
- Flow Controllers
- System Monitoring Through eConnect & Remote PLC
- Flow Logic Flow Controllers
- Annual Maintenance Agreements
- In-Field Start-Up Assistance
- In House Repair & Air End Exchanges
- Air System Design & Engineering
- Replacement Parts, Separators, Filters & Lubricant

WE MAKE AIR SIMPLE

Whether you're purchasing a new air system or in need of service, be assured that you will receive the service and customer care you deserve from Brandon and Clark. ***We Make Air Simple.***

Did you know that compressed air is considered as the fourth utility after water, electricity and heating and cooling? It is also the only utility that is completely up to you to produce for your company. Your investment in an air system is an important decision and we want to help you in that purchasing process. Rely on our expertise to help you to choose the equipment that can optimize your efforts to:

- lower power consumption
- lower service cost
- increase performance and reliability

AIR AUDITS

Brandon & Clark Air Audits review your entire compressed air system to identify

ways to maximize efficiency; reduce waste; and reduce energy, maintenance, and equipment costs. Air audits provide you with the most accurate possible data on the current system conditions to help you manage your system, identify needed component upgrades, and ensure the entire system operates as it should. Air audits have been known to:

- Reduce operating costs by 25-50%
- Reduce maintenance costs by 10-80%
- Receive documentation on power usage and your system's interrelationships
- Can be conducted without downtime or disruption to productivity

PREVENTATIVE MAINTENANCE

Brandon & Clark now offers annual air compressor maintenance contracts to help you prevent costly equipment failures and keep your equipment running at premium efficiency.
