## **MAINTENANCE = RELIABILITY**

Regular recloser maintenance preserves the reliability of operations at peak efficiency, even during peak load demand periods, and protects your system's up time. Uninterrupted service means a better financial bottom line and happier customers. You have already made a large capital investment in the purchase of reclosers to help you manage your outages. Why not make sure you, collect the full dividends of your investment by regularly performing maintenance on your reclosers? Keep your distribution switchgear operating with the reliability that you and your customers depend on.

## **COOPER POWER SYSTEMS AUTHORIZED SERVICE CENTER**

Brandon & Clark, Inc. became a Cooper Power Systems Authorized Service Center in 2004, after going through Cooper's rigorous authorization process. The Cooper authorization process included certification that our center's testing standards matched Cooper's testing standards. Our employees were also required to complete Cooper's Certified Technician programs and pass all safety evaluations.
