

Providing the latest in Motor Protection. ESP200

Brandon and Clark, a proud distributor of Siemens, introduces its latest Siemens product offering, the ESP200 Overload Relay.

The Siemens ESP200 is on the front line in the battle of protecting against damaging motor overload conditions that degrade motor insulation and shorten motor life.

This versatile line offers a motor starter for every application you may have. Ideal for oil pumping, agriculture, OEM operations and any other industrial applications.

SIEMENS

ESP200 FEATURES IN RED ADDITIONAL TO ESP100:	
4:1 current range	Optional Tamper Resistance Cover
Selectable Trip Class 5, 10, 20 or 30	Direct replacement for ESP100
Selectable Phase Unbalance Protection	Devices for Single Phase and 3 Phase application
Selectable Phase Loss Protection (trips within 3 seconds)	Self powered
Selectable Ground Fault Protection	Ambient insensitive
Selectable Manual or Automatic Reset Mode	Thermal memory
Remote Reset with 24V DC	Siemens exclusive Class 958 for superior protection of hermetically sealed compressors and artificially cooled motors which require quick trip response times with Selectable Manual or Automatic Reset Mode and Selectable Ground Fault Protection
Standard 1 NO and 1 NC Auxiliary Contacts	Siemens exclusive Class 958L for superior protection of oil well pump motors, multi-torque connections and ultra-high slip motors with Selectable Manual or Automatic Reset Mode and Selectable Ground Fault Protection
Test Button for checking the electronic functions	
Visible Reset Indicator	
Conformal Coated Printed Circuit Board
